Different Colors of Paper

Many businessmen have a system of using
different colors of paper for different printed
forms, thus distinguishing each form by
its color.

We can work this system out for you, using
HAMMERMILL BOND

the Utility Business Paper, and you will
find that it saves you time and money.

Let us show you the advantage of stand-
ardizing your paper and your printing.

The Bonanza covers Nevada and
surrounding states like a blanket.

AMERICAN FLYER AVOIDS CAPTURE

(Correspondence Associated Press)

WITH THE POLISH ARMY AT
THE FRONT, June 17—Lieutenant
Harman C. Rorison, of Wilmington,
N. C., a pilot in the Kosciuszko
squadron of American flyers with
the Polish army, who was shot down
within Bolshevik lines recently, man-
aged to escape by posing as an Aus-
trian on his way home after impris-
onment in Siberia.

Lieutenant Rorison was 30 miles
from the Polish lines when he at-
tacked a Bolshevik infantry detach-
ment, the Reds replying with rifles
and machine guns one bullet pierc-

ing the gasoline tank of his airplane.
Realizing that it would be impossible
to reach the Polish front he flew as
far as possible, making a safe land-
ing, but near Bolshevik troops. He
escaped into the heavy underbrush
with which the Ukraine in this
part of the fighting front is carpet-
ed and, after two days and nights,
reached headquarters of the squad-
ron. The airplane was recovered
later by a Polish cavalry unit and
mechanics of the squadron.

New and Valuable Fertilizer.
"Nitrated peat" is the fertilizer pro-
duced by an Italian chemist from ex-
plosives containing ammonium nitrate.
The explosive is placed in a measured
amount of water, which dissolves out
the nitrate, and after a short time is
decanted as a saturated solution. This
is mixed with peat powder and evap-
orated. The product contains about
43 per cent of ammonium nitrate, and
has been shown to have fertilizing
value nearly equal to that of sodium
nitrate.

Location books are now for sale
at The Bonanza office.

THEATRE UNDER OFFICIALS' EYE

(Correspondence of Associated Press)
PARIS, June 24—A "popular the-
tre" where plays and operas will be
given under government direction
has been definitely agreed upon by
the chamber of deputies and it is be-
lieved by its supporters that the
senate will agree. The plan has long
been contemplated.

A temporary appropriation of 100-
000 francs was voted to start the
new theatre in the Trocadero Palace
and the Comedie Francaise subsidy
of 250,000 francs was doubled to en-
able it to present plays there.

Plays will be given nightly with
two matinees on the Trocadero which
seats 5,000.

A feature of the plan is the de-
sire to make it a producing play-
house for the government conservatory,
only for the training of actors and
musicians.

AVIATOR TESTS HIGH ALTITUDE

(Correspondence of Associated Press)
PARIS, June 24—Jean Coudré, who
established a new altitude limit (on
height record June 14, 1918, when he
mounted 9,524 meters or 31,250 feet),
has satisfied himself in a laboratory
test that he may safely attempt to
reach his untaken goal of 12,000
meters or 39,370 feet.

Coudré spent many days at home
in a thermally sealed chamber, equi-
pped with instruments and other
scientific instruments.

Coudré controlled the temperature
of the air and the admission of com-
pressed oxygen through a special
mask.

The altimeter was adjusted to the
equivalent of the pressure at 10,000
meters (roughly 47 minutes
and 20 seconds and the normal at-
mospheric pressure was restored in
20 minutes.

The aviator and his apparatus
could not afford to afford. At
one time he found his eyes had
found it uncomfortable to breathe.
During most of the experiment he
kept his eyes closed.

Plant That Coughs

Bonanza has received an interest-
ing plant which you may have there
are laughing and weeping flowers, and
now, according to the Journal de la
Sainte, there is in the house a "cough-
ing plant." Its fruit is like the cotton-
seed bean. It is easily grown to an-
ger, and what is more strange, has a
horror of all kinds of dust. As soon as
a few grains fall on the leaves the
stomates or air cells, which are the
breathing organs, fill with gas, puff
out and throw off the dust with slight
explosions like the cough of a child.
